

DIMER Engineering s.r.o.

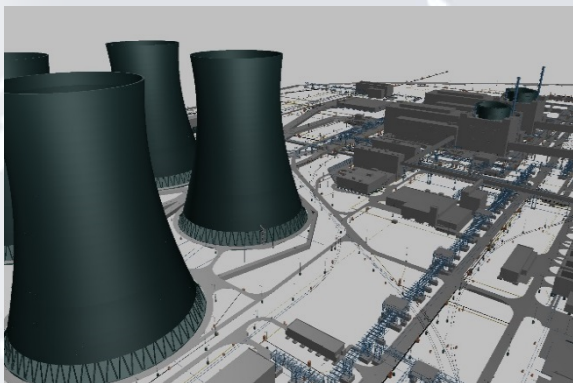

your sealing partner for nuclear power plant

DIMER Engineering s.r.o. supplies the seals and gaskets to all security levels.

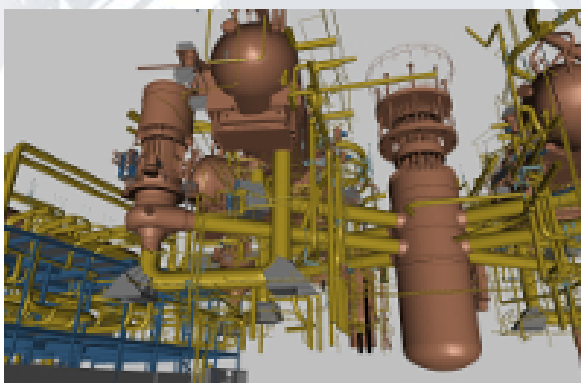

We deliver not only the seal but also the solution so engineering is the most important part of our service.

If for equipment qualification special design is needed we offer our expiriencies with it and also with qualification itself.

These are the types of gaskets and seals:

- ❖ graphite and semi-metalic gaskets together with flange joint design analysis (calculations, stand tests etc.)
- ❖ spiral-wound gaskets in grooves
- ❖ all kind of flange gaskets in other areas of the nuclear power plants
- ❖ seals and rubber parts for the pneumatic control systems, vessels etc.
- ❖ special solutions with elastomeric seals and also with plastic parts
